

Modifications to Worship Service

The COVID-19 Task Force has designated a Re-entry Team that is responsible for developing the plan and strategy for returning to in-person worship. The factors to be considered when developing the plan will include several factors including guidance from the public health officials. As we move forward towards a complete return to in-person worship service, the option to allow members to stay connected and participate in worship service will be made available through video and other streaming technologies. The order of the worship service will be modified to promote social distancing and limit the potential for exposure to the virus:

- Staff and individuals entering the sanctuary for worship service will be directed to designated seating that complies with social distancing requirements.
- No communal communion. Pre-packaged communion cups will be distributed prior to and during worship service on the 1st Sunday of each month. In addition, communion cups will be distributed during the day that financial contributions can be dropped off.
- The order of service will be modified periodically as needed.
